Pantec GS Systems names IPT as agent for the United States Swiss based refining specialist cooperates with the US industry leader in hotfoil solutions

Pantec GS Systems has appointed IPT, INNOVATIVE PRINTING TECHNOLOGY, headquartered in Sarasota, Florida, as its agent for the United States.

IPT has more than 25 years' experience in the printing and hot stamping industry with a broad customer basis including the largest printing companies in North America. With a deep knowledge of the North American market combined with their European background, IPT is focused to import equipment which is fulfilling the requirements of the North American market.

For Peter Kuschnitzky, President of IPT, the equipment of Pantec GS Systems is perfectly fitting into his product portfolio: „Our major mission at IPT is targeted to reduce manufacturing costs at our customer's plant. Pantec GS Systems' solutions are characterized by an unrivalled degree of efficiency in hot foiling and hologram inseting – a major factor to make my customers more profitable.”

Peter Frei, CEO at Pantec GS Systems, names Peter Kuschnitzkys' extensive experience in the hotfoil industry as an excellent basement for the cooperation: „Peter has an excellent background to consult our customers on the various differences of technologies and their application. In order to maximize the benefit of our customer, we need someone like him who understands in depth the needs of a customer and the special benefits of each of our products.”
